**BATTERY BACKUP  
NOW AVAILABLE**

**The Professional Installer's 1st Choice!**

**Eco-Friendly**

Efficient design results in ongoing energy savings.

**Ultra-Smooth and Quiet Operation**

Variable speed operation delivers ultra-smooth, quiet performance, increasing long-term reliability.

**Belt Drive or Chain Drive**

Choose from our exceptionally quiet belt drive or our solid-performing chain drive.

**Safety First, Safety Always**

If the obstacle-sensing beam is crossed when the door is closing, the door reverses to fully open.

**Park or Reverse Door**

To permit both ventilation and access, the garage door can be stopped and parked during either upward or downward travel.

**Secure, Responsive Remote Control**

Precision remote controls operate over a long range and employ high-security technology.

**Deluxe Wall Station**

All controls are large, clearly marked and illuminated (door UP/DOWN control, courtesy light switch and vacation mode).

**Automatic Courtesy Light**

A built-in 100W MAX light illuminates the garage for five minutes every time the operator is used (except when operating on battery backup).

**Easy Door Release**

When you need to open or close the garage door manually, simply release the operator's quick-disconnect trolley.

**Assurance Through Self Checks**

The operator's self-diagnostic system continually checks to see whether everything is working properly. In the unlikely event of a problem, it will pinpoint the trouble and let you know by flashing the courtesy light. You can often solve the problem on the spot with a call to your Garage Door Depot dealer.

The Garage Door Depot will take care of all your garage door needs. In addition to garage door operators, we provide fast friendly repair services, new garage door sales and professional installations.

Our trained and certified technicians use the highest quality materials at prices you can afford.
